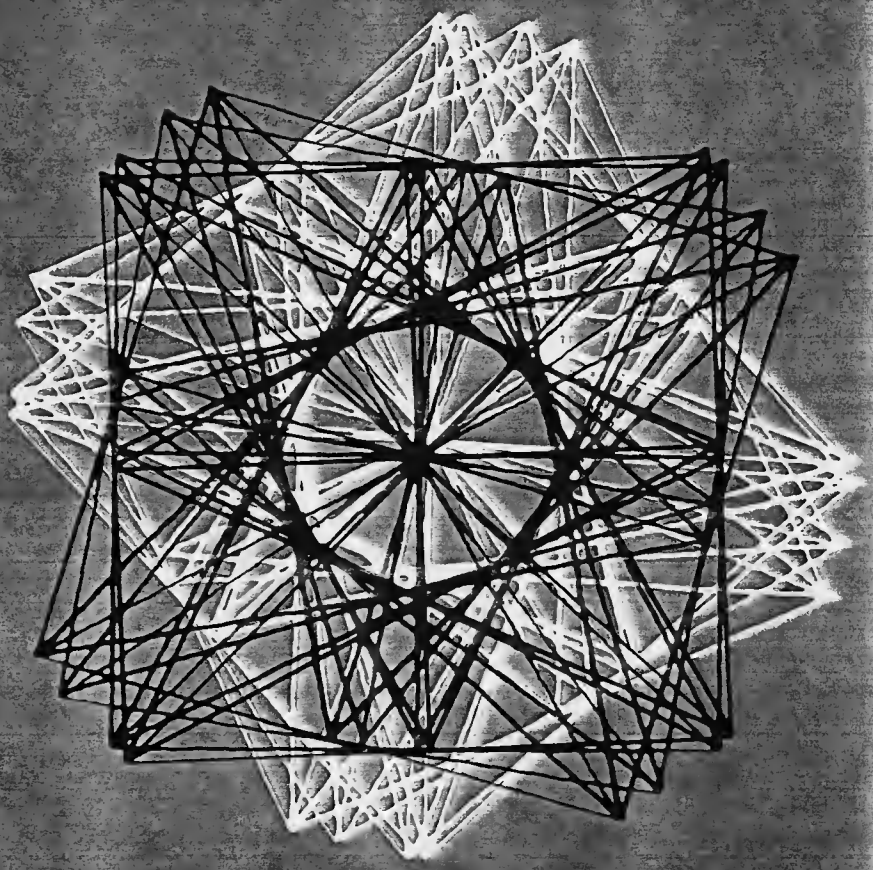
1962-109

Massachusetts Institute of Technology Project MAC Progress to July 1964



NBS 297/10

Project MAC Memoranda

Memorandum MAC-M-NO.	SUBJECT	AUTHOR
20	Cybernetics and Technical Progress	A. Berg
21	Kiev Cybernetics Section	L.A. Kaluzhinin A.A. Stovniy
22	Future of Cybernetics	V. Gukov
23	Topics for Oiscussion at Meeting on Intergalactic Computer Network	J.C.R Licklider
24	Time-Sharing: Justification, Problems, Solutions	L.L. Lombardi
25	Notes on Time-Sharing	N.H. Taylor
26	Reactive Typewriter Meeting	F.J. Corbato
27	Man-Machine Relations	N.H. Taylor
28	Problem Areas of Time-Shared Computer Systems	F.J. Corbató
29	Problems on Synthesis of Oecoding Trees	W.H. Kautz
30	Thoughts on Project MAC	M.V. Wilkes
31	Non-Optical Graphical Input for CRT Displays	O.C. Englebart

32	Time-Sharing Computing Systems	J. McCarthy
33	The Octopus Report	N. Hardy
34	Outline of a Large Computer System	L. Monrad Krohn
35	Making the Scientist More Effective	D. Engelbart
36	Thoughts on Machine-Aided Oesign System for Multi-Queue	R.L. Sisson
37	Province of Panel on Users	O.B. Yntema
38	Telephone Oe-bugging	N.H. Rochester
39	Oirect Communication Between Independent Business Computation Centers - a cover for three articles: System Communications	L.L. Lombardi
	Computer Communication - A Problem That Can Be Solved	S.K. Plotnick
	Logic of Automation of System Communications	S.K. Plotnick
	Some Thoughts with Respect Meeting the Technical Objectives of Project MAC	L.L. Lombardi
		H.M. Teager
41	Thoughts on Users and Terminals	J.A. Rusling
42	On Aiding Creativity	U. Neisser

43	Project MAC and the University Environment	R.M. Brown
44	Functions Desirable in Time-Sharing System	JCR Licklider
45	Group Interaction, Conferncing and Consulting in the Time-Sharing System	A. Rosenberg
46	Some Audio I/O Possibilities for MAC Systems	G.A. Miller
47	Common and Uncommon Requirements Between Users	N.H. Taylor
48	Thoughts on Users and on (at least one) Current Compiler Language	K. Smith
49	Terminals in First Phase of MAC, Remarks on User Requirements	D.B. Yntema
50	Brief Functional Description of ESL Display Console	J.E. Ward
51	Modus-Operandi: A Suggestion	F.F. Lee
52	Simulation and Dynamic Modeling	M. Greenberger
53	Self-Teaching Program On and Through Time-Sharing	D. Eastwood
54	MEMEX 1963	R.F. Simmons

55	List of Users' Requirement Factors: Version 1	R.L. Sisson
56	Location and Distribution of Terminals	A.I. Dumey
57	Thoughts on the Philosophy of MAC	R.L. Sisson
58	Manipulation of Tables of Psychologic	D.B. Yntema
59	System Planning	E.S. Fergusson
60	On-Line Control of Experimental Procedures	J.I. Elkind
61	Functional Specification for Languages and Compilers	J. Sammet
62	Notes on the MAC Schedule	R.L. Sisson
63	An Experiment	A.I. Dumey
64	Typewriter Features Considered Desirable	JCR Licklider
65	Notes on the "Structure" of Computer Technology	R.L. Sisson
66	Facilities (Users' Language) Phase 2	R.L. Sisson
67	Parallel Consoles	U. Neisser
68	A Proposed Terminal System	F.J. Corbato

	for the Project MAC and Computation Center IBM 7094 Computers	
69	Topics Relevant to Administrative Policy	A.A. Cohen A.I. Dumey J.A. Rusling
70	Terminals: Definition, Problem Areas and Some Suggested Activities	F.F. Lee
71	What are We Trying to Do?	R. Kain
72	Project Summer Study, 1964	D.K. Pollock
73	Answer to JCR Licklider's Report of August 5	R. De Vogelaere
74	Short Thoughts on Long Memories for Language Processing	R.F. Simmons
75	Skeleton of Part of Users Panel 1 Report	D.B. Yntema
76	Command Language	N.H. Rochester
77	Project MAC and the "Small User"	E.S. Fergusson U. Neisser
78	Steps on the Road to Memex	U. Neisser
79	A Comment on MAC Planning	W. Jocobs
80	Evaluations of Importance to Users	D.B. Yntema

81	MAC Planning	N.H. Hardy
82	Tentative Teletype Equipment Order	R.G. Nills
83	Learning from Users	J . Weizenbaum
84	Tentative Dutline for Final Report	J.B. Dennis
85	The Naive User	K. Smith
86	Criteria for Using a Display System as an Input-Output Device	N. H. Taylor
87	Draft of Section on Teaching Routines in the Light of Panel Discussion	U. Neisser
88	Item Identification in Dialogues or, "Are We Talking About the Same Thing"	R. M. Brown
89	Programming Systems for the MAC Time-Sharing System	M. L. Minsky
90	GGEN: A MAD Language Generation System for Timesharing	R. F. Simmons
91	Summary of Comments on Administrative Ploicy	A. A. Cohen A. I. Dumey J. A. Rusling R. L. Sisson

92	Five Weeks Experience with CTSS (Yntema's A.1.f.)	CTSS Users (K. Smith, Secy.)
93	Surveillance of Technological Progress	A. A. Cohen
94	Results in an Experiment in Man-Machine Reaction	D. C. Engelbart
95	Longer Range Requirements of Student Users	R. De Vogelaere
96	A Form of Group Interaction Easily Available on CTSS	D. C. Engelbart
97	A Brief Description of the Machine Structure Proposed by Amdahl	R. M. Brown
98	A Viewpoint on MAC Research	D. C. Engelbart
99	Look Ahead Memory Implementation	F. F. Lee
100	General Needs of the Scientific User	D. McCowan
101	A Multiprogramming Multi-processing Simulator	N. H. Rochester
102	Console Central and the Tea Cart Console	E. S. Fergusson
103	An Evaluation of the Compatible Time-Sharing System	M. V. Wilkes

104	Incremental Data Assimulation in Dpen-Ended Manned Computer Systems	L. Lombardi
105	User Functions and User Groups	N. Taylor and G. Culler
106	Systems Drganization	N. Taylor
107	A Proposal for Modifying the IBM 7094 Computer for a Directly Addressable Large Core Memory	F. J. Corbato
108	Project MAC - it's Goals and Status	R. G. Mills
109	Revised Plans for PDP-1 Input-Output	J. E. Ward
110	Structural Description of a Modular Time-Sharing System	Daley, Corbato Daggett, Hellwig
111	Operating Procedure for the Interactive Version of 1620 FORGD	L. L. Selwyn
112	Fast-Interaction Around-the-Clock Remote Consoles	M. L. Minsky
113	How to Break the Log-Jam on Multiple Display Consoles	M. L. Minsky
114	Proposal for the 7094 Direct Data Channel Switch	F. F. Lee

115	An Approach to a Dynamic Storage Allocation	E. Van Horn
116	Fortran Improvements	L. Selwyn
117	Tailored User Terminals	S. Ferguson
118	A Proposal for a Mathematical Manipulation-Display System	M. L. Minsky
120	Survey of the Requirements for an M.I.T. Interactive Algebraic Compiler	Colman, Everest, Lombardi, and Selwyn
121	Time-Shared Computer Scheduling	R. Y. Kain
122	Demon: ESL Display Console Demonstration Program	R. B. Polansky
123	Real Time Serial Computation	D. Arden
124	Derivator I	M. L. Minsky
125	ESL Display Console Time Studies	
126	A Proposed Improvement of the 7094 Memory Protection RPQ	Corbato
127	Further Plans for a PDP-1 Input-Dutput Buffer Unit	J. E. Ward

128	Secondary Storage in LISP	D. Edwards
129	LISP Garbage Collector	M. L. Minsky
130	The I/O Input-Output Adapter in the Modular Time-Sharing System	Creasy, Hellwig, Corbato
131	Look-Aside Memory Simulation	F. Lee
132	LISP System	D. Edwards
133	A Directory to the MAC Time-Sharing System	Hellwig, Corbato
134	LISP Exercises	T. Hart
135	The Graphical Typewriter	M. L. Minsky
136	C.T.S.S. Document Tape	C. C. Staff
137	A Machine Structure for Dynamic Storage Allocation	J. B. Dennis
138	A Proposal for a MAC Standard 1050 Golf Ball	M. I. Levin
139	C.T.S.S. Version "CHAIN"	Logcher
140	On-Line Version of GPSS II	M. M. Jones
141	Specifications for IBM Selectric Input/Dutput Writer for ESL Display Console	J. Ward

142	LISP As the Language for an Incremental Computer	B. Raphael and L. Lombardi
143	Research Program in Machine Structure	J. B. Dennis
144	Procedure for Obtaining User Comments	R. G. Mills
145	Corrections to the Arden Serial Multiplier	R. G. Mills
146	AED-0 Programmer's Guide	C. G. Feldman D. T. Ross
147	Short Time-Sharing Console Problems	F. J. Corbato
148	Natural Language Input Problem-Solving System	D. G. Bobrow
149	Translating Ordinary Language into Symbolic Logic	J. L. Darlington
150	Disk Storage Capacity	R. G. Mills
151	Typewriter Communication with a Multi-Access Computer	J. B. Dennis
152	CTSS Technical Notes	J. H. Saltzer
153	Time Sharing LISP	W. A. Martin T. P. Hart

154	Warnings and Restrictions in AED-0	C. G. Feldman
156	COMIT Operation in the MIT Time-Sharing System	V. Yngve
157	Emergency Procedures for Conservation of Disc Storage	R. G. Mills
158	Syntax of the New Language	M.Levin
159	New Language Storage Conditions	M. Levin
160	Recursive Procedures in AED-0	G. Rodriguez
161	Statistics for C.T.S.S.	F. Whitelaw and M. Jones
162	Remote Graphical Display at High Burst Speed	F. F. Lee
163	A Processor Design: MAP-1	
164	Slave Memories and Dynamic Storage Allocation	M. V. Wilkes
165	Hash Coding Functions of a Complex Variable	W. A. Martin

166	B-Core System for Programming the ESL Display Console In Time Sharing	C. Lang
167	A New Editing Program	A. L. Samuel
168	A Subroutine Trace Program for C.T.S.S.	B. Wolman
169	LOADER: A New Version of the BSS Loader	B. Wolman
170	Comments on Slave Memories	R. Y. Kain
171	Problem T113 Conventions for Disk Storage and Program Write-Up	C. G. Feldman D. T. Ross

13. ABSTRACT

The broad goal of Project MAC is experimental investigation of new ways in which direct links to on-line computers can aid people in their individual work; whether research, engineering design, management, or educstion.

This is the first annual Progress Report describing the resesrch which hss been csrried out under the sponsorship of Project MAC. The details of this research may be found in the publicstions listed at the end of the report.

14. KEY WORDS

Computers
Machine-aided cognition
Multiple-access computers
On-line computer systems
Resl-time computer systems
Time-sharing
Time-shared computer systems
